

NEWSLETTER DECEMBER 2009

Improved DTZK-25 and -37

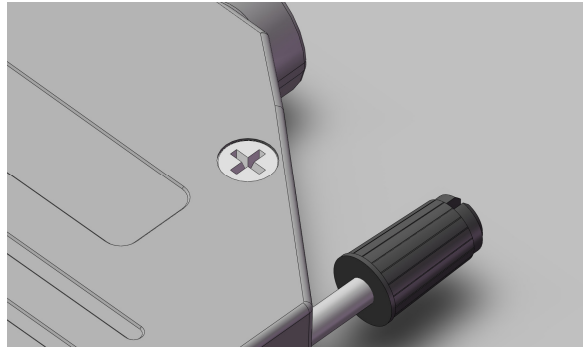

During the last couple of month's we have made some changes to our size 25 and 37 diecasted zinc hoods with straight cable entry. The new versions are lighter and designed to improve the die-casting process regarding burs and ejector marks

New mounting screws for DTZK37

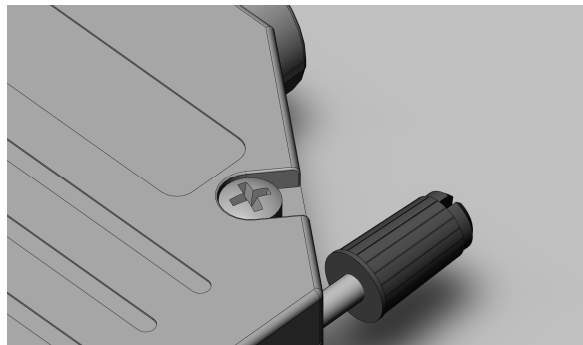

We have changed the mounting screws for our DTZK37, so that our complete range now uses the same countersunk type.

The changes will be effective from today

New countersunk flat head (DTZK37)

Old Pan head type (DTZK37)

For further information please contact R&D manager René Kok at +45 5476 0543 or rene.kok@ossi.dk

Best regards
